

INSTALLATION GUIDANCE

Deck-Mounted Fixed Standard Spout

B&M SKU: ID02027-E Idral code: 02027/E

Installation sequence

- 1 Confirm that the mounting position and connection size match the Idral technical drawing.
- 2 Flush the supply pipe before connection so debris cannot reach the outlet or aerator.
- 3 Fit the spout squarely on the mounting surface or wall connection without placing stress on the brass body.
- 4 Tighten the connection and seal as required for the installation, then check for leakage.
- 5 For swivel models, confirm free movement and that the outlet remains over the basin/sink throughout its travel.

Important

Use the manufacturer technical drawing as the controlling dimensional reference. Do not use abrasive tools on chrome surfaces.
